

REMARKS

1. Sheets 2-4 show a marked up replacement paragraph consisting of math definitions and equations under my subsection heading, Underlying Mathematics. Delete the several equations that have strikethrough lines, e.g. $\text{---}F = 16500(\text{hp})(l)/\pi(n)(Rv)(r')\text{---}$ and insert all the underlined definitions and equations. The equations are followed by a newly added paragraph, which is followed by a marked up replacement paragraph consisting of an example that ends on sheet 4. The example is followed by strikethrough lines on sheets 4-6. Delete all the strikethrough lines, which will complete the entire subsection.
2. Sheets 7,8 of this 5th amendment begin with a newly added paragraph followed by two marked up replacement paragraphs. Insert the newly added paragraph followed by both replacement paragraphs into the specification immediately following the title, Interchanging 4-Stroke and 2-Stroke, and delete the entire 4th paragraph shown with strikethroughs through all its lines. That will replace my entire subsection.
3. Sheet 9 – The three paragraphs are the last three paragraphs in the written description. The two line unmarked paragraph between the two marked up replacement paragraphs is not new but is included for simplicity to avoid an error. Insert all three as shown as the last three paragraphs in the written specification.
4. The current status of claim 20. (currently amended): and claim 21 (currently amended): is used upon advice from the PTO in a phone inquiry. Claim 7. (thrice amended): is unchanged.
5. FIG 12 in the drawings has been replaced in the following sheet, which has “REPLACEMENT SHEET” printed in its top margin. None of the other drawings have been altered in this 5th amendment.

The matter in this 5th amendment is equivalent to existing matter. There is no new matter.
